

Demonstration of proposed features

Date	7/7/2026
Name	Y Varshith
Project Name	Smart Lender
Maximum Marks	1 Marks

Feature Implementation Status:

S. No	Feature Name	Description	Status	Demonstrated	Remarks
1	Loan Eligibility Prediction	Predicts whether a loan application is approved or rejected using a trained Machine Learning model.	Implemented	Yes	Prediction generated successfully
2	Applicant Information Form	Collects applicant details such as income, education, loan amount, credit history, employment status, and dependents.	Implemented	Yes	User-friendly interface
3	Machine Learning Model Integration	Integrates the trained model.pkl with the Flask application for real-time prediction.	Implemented	Yes	Model loaded successfully
4	Responsive Web Interface	Provides a responsive and attractive interface using HTML, CSS, Bootstrap, and JavaScript.	Implemented	Yes	Supports desktop and mobile browsers

5	Result Display	Displays the prediction result (Approved/Rejected) and suggestions for rejected applications.	Implemented	Yes	Results displayed correctly
6	Project Documentation & GitHub Repository	Maintains complete project documentation and source code in a GitHub repository.	Implemented	Yes	Repository submitted successfully

Feature Implementation Summary:

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
