

Scalability & Future Plan

Date	7/7/2026
Name	Y Varshith
Project Name	Smart Lender
Maximum Marks	1 Marks

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to larger user bases increase data loads, or extended features in the future.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address
1	No user authentication	Unauthorized access may occur	High
2	No database integration	Prediction history is not stored	Medium
3	Limited deployment (local Flask app)	Restricted scalability and accessibility	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited local users	Deploy on cloud with load balancing
2	Data Storage	No persistent database	Integrate MySQL/PostgreSQL
3	Performance	Single-model local execution	Optimize model and enable caching
4	Security	Basic input validation	Add authentication, HTTPS, and role-based access

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Cloud deployment and database integration	1–2 Months	Improved accessibility and data management
Phase 2	User authentication and admin dashboard	2–3 Months	Enhanced security and administration
Phase 3	Prediction history and analytics dashboard	3–4 Months	Better monitoring and reporting
Phase 4	Advanced ML models and API integration	4–6 Months	Higher accuracy and enterprise scalability
