

Technology Stack

Date	7/7/2026
Name	Y Varshith
Project Name	Smart Lender
Maximum Marks	4 Marks

Technical architecture:

The deliverable shall include the architectural diagram as below and the information.

Components	Description	Technology
User interface	Web interface for loan application and prediction	HTML, CSS, JavaScript
Application logic 1	User registration login and authentication	Python (Flask)
Application logic 2	Loan application processing and validation	Python, pandas
Application logic 3	AI based loan approval prediction	Scikit-learn, numpy
User details	User should be enter the required fields	Python, flask
Machine learning model	Loan approval prediction model	Random forest classifier, XG boost,

Infrastructure	Application deployment on server or cloud	Local server, render
----------------	---	----------------------

Application characteristics:

Characteristics	Description	Technology
Open source frameworks	List the open-source frameworks used	Flask, Pandas
Security implementations	Access controls to be used	HTTPS or local host
Availability	Justify the availability of application	Local cloud hosting
Performance	Design consideration for performance of Application	Pandas, numpy, optimized ML model
