

### Project Executable Files

|               |              |
|---------------|--------------|
| Date          | 7/7/2026     |
| Name          | Y Varshith   |
| Project Name  | Smart Lender |
| Maximum Marks | 3 Marks      |

### Project Executable Files:

| S.No | Item to Submit                               | Submitted |
|------|----------------------------------------------|-----------|
| 1    | Complete source code (all files and folders) | Yes       |
| 2    | README / Setup Guide                         | Yes       |
| 3    | requirements.txt                             | Yes       |
| 4    | Database schema / seed files (if applicable) | N/A       |
| 5    | Environment configuration (.env.example)     | No        |
| 6    | Deployed application URL                     | No        |
| 7    | APK / Executable binary                      | N/A       |
| 8    | Dockerfile / Containerization config         | No        |
| 9    | Test files and test results                  | Yes       |
| 10   | Demo video / walkthrough                     | Yes       |

## File / Folder Structure:

### SMART-LENDER/

```
|— .vscode/

### Deployment / Access Details:

|                             |                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------|
| Hosted / Deployed URL       | Not Hosted (Runs Locally)                                                                                   |
| Login Credentials           | Local Host                                                                                                  |
| Platform / Hosting Provider | Local Flask Server                                                                                          |
| Repository Link             | <a href="https://github.com/varshith-git17/Smart-Lender">https://github.com/varshith-git17/Smart-Lender</a> |
| Demo Video Link             | <a href="#">project Demo video link</a>                                                                     |

### Run Instructions:

1. Clone the repository.
2. Install dependencies using requirements.txt.
3. Run app.py.
4. Open <http://127.0.0.1:5000> in your browser.
5. Enter applicant details and click Predict.

### Known Issues / Limitations:

| S.No | Known Issue            | Workaround / Status |
|------|------------------------|---------------------|
| 1    | Runs locally only      | Deploy to cloud     |
| 2    | No database            | Can integrate MySQL |
| 3    | No user authentication | Can be added later  |
