Brainstorm & Idea Prioritization Template:

Smart Lender is a Machine Learning-powered web application designed to predict the loan eligibility of applicants. The system helps banks and financial institutions make faster, more reliable, and data-driven lending decisions by analyzing applicant details and determining whether a loan application is likely to be approved or rejected.

The application evaluates multiple classification algorithms and deploys the best-performing model through a Flask-based web interface for real-time predictions.

Step-1: Selecting the Problem Statement:

TEMPLATE

Brainstorm & Idea Prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

10 minutes to prepare

1 hour to collaborate

BEFORE YOU COLLABORATE

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

TEAM GATHERING

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

SET THE GOAL

Think about the problem you'll be focusing on solving in the brainstorming session.

LEARN HOW TO USE THE FACILITATION TOOLS

Use the Facilitation Superpowers to run a happy and productive session.

1 DEFINE YOUR PROBLEM STATEMENT

Smart Lender is an AI-powered loan approval prediction system that helps banks evaluate loan applications quickly and accurately using machine learning.

PROBLEM

How might we predict loan approval status accurately using Machine Learning?

KEY RULES OF BRAINSTORMING

To run a smooth and productive session

Stay in topic.

Defer judgment.

Go for volume.

Encourage wild ideas.

Listen to others.

If possible, be visual.

Step-2: Idea Phase

3 My Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize and choose. Categorize notes as themes within your mural.

- Banking Decision Support System

FASTER & ACCURATE LOAN APPROVAL DECISIONS | Better insights. Lower risk. Happier customers.

Step-3: Idea Prioritization

04 Prioritize

Plot each idea on the graph based on its Importance (Impact) and Feasibility (How easy it is to implement). Ideas in the top-right corner are ideal.

 20 MINUTES

TIP

Focus on ideas that are both important and feasible. These are the ideas that can deliver the most impact with the effort you have.

IMPORTANCE (IMPACT)
How much value or impact the idea will create if implemented.

FEASIBILITY (EASE OF IMPLEMENTATION)
How easy or practical it is to implement the idea with available time, tools, and resources.

Plotting ideas on the matrix:

- High Importance, Low Feasibility:** Fraud Detection
- Medium Importance, Low Feasibility:** Automated Loan Verification
- Low Importance, Medium Feasibility:** Banking Decision Support System
- Medium Importance, High Feasibility:** Credit Risk Analysis, Credit Score Prediction
- High Importance, High Feasibility:** Loan Approval Prediction
