

Project design Phase

Proposed solution

Date	7/7/2026
Name	Y Varshith
Project Name	Smart Lender
Maximum Marks	2 Marks

Proposed solution:

Parameter	Description
Problem statement	Banks spend significant time reviewing loan applications manually
Idea or solution description	Develop a machine learning based web application that predicts whether a loan application is likely to be approved based on applicant details
Novelty or uniqueness	System provides quick and accurate loan predictions
Social impact	It tells applicants receive faster responses and supports banks in making efficient fairer and loan decisions
Revenue model	Solution can be offered to banks and financial institutions as software service
Scalability of the solution	The applicant application can be scaled to support more users or large datasets
