

## Solution Requirements

|               |              |
|---------------|--------------|
| Date          | 7/7/2026     |
| Name          | Y Varshith   |
| Project Name  | Smart Lender |
| Maximum Marks | 4 Marks      |

### Functional Requirements:

| Functional Requirement | Sub Requirement                  |
|------------------------|----------------------------------|
| User Login             | Registration through get started |
| User enter details     | Required fields                  |
| Loan application       | View process                     |
| Loan approved          | View loan approved or not        |
| Loan rejected          | View loan rejected purpose       |

### Non- Functional Requirements:

| Functional Requirement | Sub Requirement                                                                          |
|------------------------|------------------------------------------------------------------------------------------|
| Usability              | Application should provide a simple interface for all users.                             |
| Reliability            | Application should provide accurate and consistent loan prediction results.              |
| Performance            | Loan prediction results should be generated within a few seconds                         |
| Availability           | Application should be available for 24 by 7 with minimal downtime                        |
| Scalability            | Application should support multiple users and increasing application request efficiently |
